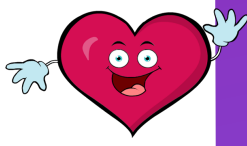
HYDRATION SUMMARY

FOR STUDENTS

1. Hydration is necessary for energy. Feeling tired and low in energy can be a sign that we are not drinking enough water.

2. Adequate hydration helps the brain to concentrate and make decisions.

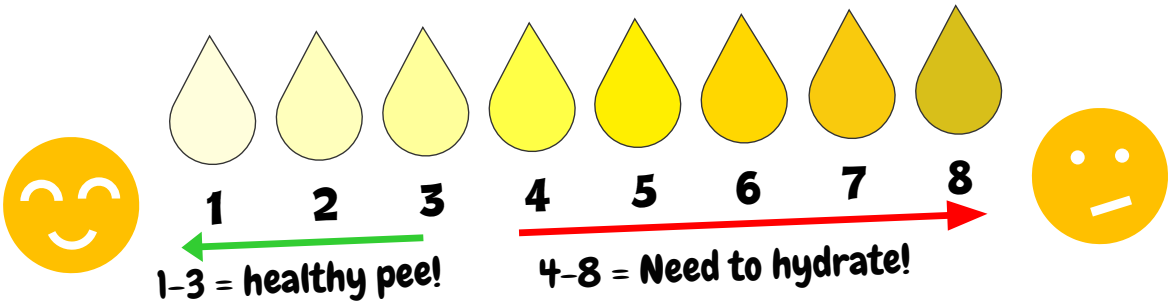


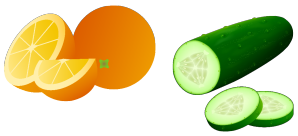
3. Hydration makes the heart's job easier of pumping blood throughout the entire body!

4. Drinking water helps replace lost fluids during sweating caused by heat or exercise. This regulates body temperature.

5. Aim to drink **6 to 8** cups of liquids a day!

6. The colour of urine indicates how hydrated we are.





7. Vegetables and fruits are another fantastic source of hydration for the body due to their high water content.

HYDRATION SUMMARY

FOR STUDENTS

SOME HYDRATING TIPS:

- Drink a glass of water when you first wake up in the morning.
- Fill-up your school water bottle even when at home to sip throughout the day.
- Add slices of fruit, like orange, apple, or berries, to your water for extra flavour!
- Some drinks contain a lot of sugar which can affect energy and mood. Try these swaps instead!
